Course Objectives	To strengthen the capacity for developing creative and responsible solutions to the professional challenges based on the appropriate level of knowledge of the ideas and practices of architecture from 15th century to the Modern Time (19th century) in the diverse regional and historical contexts.						
Textbook	<i>Selected chapters from: KAC Creswell, Early Muslim Architecture, The American University of Cairo Press, 1989; S. Kostof, A History of Architecture, Oxford, 1995; G. Goodwin, A History of Ottoman Architecture, Thames&Hudson, 2003<; D. Watkin, A History of Western Architectur, Laurence King Publishing, 1996.</i>						
Learning Outcomes	After successful completion of the course, the student will be able to:						
	1	Recognize the different labels and periods in architecture from Renaissance to Modern Time					
	2	Identify buildings from each of the selected styles and periods					
	3	Understand the relationship between history of architecture and practical work					
	4	Compare, analyse and make critique of the relationship: built environment and the social, political, economic & cultural formative					
	5	Develop skills in written and graphic analysis of art works and buildings					
Teaching Methods	Teacher focused methods: combination of weekly lectures and presentations, the seminar method; the study assignment method - delivered both on campus and on-site during the field trips.
